COROLLA

TOYOTA

IMPRESSIVE NO MATTER HOW YOU LOOK AT IT

THE GREATEST COROLLA EVER? YES, AND YES.

Corolla has been a favourite of Canadian drivers for decades, and that history is destined to repeat with the new 2017 Corolla. It features a restyled front end and an updated premium interior that blends high tech with high style. And now there's even more to love with the introduction of the new Corolla iM. A sport hatchback that offers the versatility and performance you crave in one incredibly stylish package. Both models offer standard cutting edge safety innovations, dynamic handling, and remarkable fuel efficiency to ensure that every ride is as memorable as the last. The 2017 Corolla and Corolla iM – driving never felt so right.

THE NEW COROLLA iM

WITH ALL THE FUN AND STYLE WE COULD FIT

STYLE BALANCED WITH SUBSTANCE

WE NEVER STOP FINDING WAYS
TO MAKE YOU STOP AND STARE.

You may appreciate the Corolla for all of the smart, functional benefits it offers, but you're going to love it for how it looks and how it makes you feel. The refreshed 2017 Corolla features a sleek, aerodynamic design, set off by a distinctively re-styled front end. Not to be outdone, the new Corolla iM is packed with exciting features that show off this hatchback's fun, sporty side, including a black honeycomb grille, rear spoiler and chrome tipped exhaust. Both models feature an elevated style that is something that simply can't be ignored. Didn't expect all this from Corolla? That's okay...because Corolla has been built to surprise and delight at every turn.

COMFORT THAT FITS WHO YOU ARE

MADE FOR HOW YOU MOVE AND WHEREVER YOU WANT TO GO.

Corolla is the place where comfort, style, and inspiration meet. Inside the premium interior, you are surrounded by soothing materials and smart finishes. The interior comfortably fits five of your friends, with plenty of rear legroom to spare. Not to mention the versatility to handle whatever your big life has in store. And this is even doubly true with the Corolla iM, with a rear hatch that reveals a spacious cargo, which means you won't have to sacrifice fun for practicality.

PERFORMANCE THAT THRILLS

DYNAMIC FEATURES THAT BRING EXCITEMENT TO EVERY DRIVE.

The Corolla SE and XSE models are made for those who live life in the fast lane. It features performance-inspired touches like a contoured steering wheel, front sport seats, and a rear spoiler that show off its athletic side to perfection. Couple that with the CVTi-S transmission for improved fuel efficiency, and you'll agree that this total package is the kind of performance that you'll feel even when you're in park.

SPORT GAUGE CLUSTER WITH COLOUR MID The available sport gauge cluster amplifies your drive with an illuminated speedometer and tachometer. And with the new colour Multi-Information Display, you can see your fuel consumption, current song selection and more — all at a glance.

PADDLE SHIFTERS Available paddle shifters let you shift gears without letting go of the wheel. Just a light touch on either lever gives you lightning-fast gear changes, putting you in total control.

SPORT MODE With the push of a button, the available Sport Mode turns up the excitement with CVTi-S transmission. Once enabled, the Engine Control Unit and simulated shift points are changed to enable a sportier feel.

FUEL EFFICIENCY BY DESIGN

MAKE THE MOST OF LIFE,
ONE KM AT A TIME.

The future of mobility needs to be efficient. As always, Toyota is making fuel efficiency a priority with the 2017 Corolla. Its streamlined exterior includes aero-stabilizing fins and a sleek finely tuned underbody that help to enhance handling and improve fuel efficiency. The Corolla LE ECO also offers Valvematic technology, matched with

a Continuously Variable Transmission with intelligence and Shift mode, low rolling resistance tires, and a whole lot more to help you take advantage of every single kilometre. Sustainability, through smart, innovative design – just another way the Corolla will take you farther.

CONTINUOUSLY VARIABLE TRANSMISSION WITH INTELLIGENCE AND SHIFT MODE (CVTi-S) Corolla's CVTi-S features several enhancements to improve its efficiency and help create a driving sensation more similar to a traditional hydraulic automatic transmission. Toyota engineers have incorporated simulated shift points into acceleration and deceleration curves to help create a sense of positive shift engagement and engine response.

ECO DRIVING MODE The ECO Mode button available on Corolla LE ECO eases the gas pedal output and adjusts the air conditioning for enhanced fuel efficiency. Now you can go the distance for a long, long time.

THE FUTURE OF
MOBILITY

As we look toward tomorrow, Toyota is creating the technologies that can take us all there. Like the new Mirai, Toyota's groundbreaking fuel cell vehicle. Powered by an industry-leading fuel cell electric drive train, the Mirai uses no gasoline. It generates its power from hydrogen, and the only by-product out of the tailpipe is water vapour, creating zero emissions. The Mirai is a landmark in Toyota's mission to achieve sustainable mobility.

INTRODUCING TOYOTA SAFETY SENSE™ (TSS)¹⁰

Over the years, promoting a safe driving environment has always been one of Toyota's top priorities. That's why the 2017 Corolla and Corolla iM come standard with Toyota Safety Sense™ (TSS)¹⁰ – our next stage in Toyota's active safety technology. Simply put, TSS helps create in-the-moment safety that supports your awareness and decision making on the road. A vehicle that thinks about safety with you? Now that's technology anyone can appreciate.

A white Toyota Corolla iM is shown driving on a two-lane road with a yellow double line. The car is in the foreground, moving towards the left. The background features a line of green trees under a clear blue sky. A dark blue horizontal band is overlaid on the right side of the image, containing the text "SAFETY SHOULD NEVER BE AN OPTION" in white.

SAFETY

SHOULD NEVER BE AN OPTION

OUR TOP PRIORITY IS YOUR PEACE OF MIND

EVERY JOURNEY SHOULD BE A SAFE ONE.

Nothing is more important to us than your safety. That's why the 2017 Corolla and Corolla iM are equipped with cutting edge safety technology designed to help you avoid accidents before they happen and to protect you if a collision is unavoidable. And it's that dedication that makes Toyotas so dependable. In fact, over 80% of Corollas sold in Canada in the last 20 years are still on the road today.¹⁷

This warranty covers any sheet metal found, under normal use, to have developed a perforation from corrosion due to defects in material or workmanship.

DISCLAIMERS

(1) All Toyota vehicles shown in this brochure have Supplemental Restraint Systems (SRS). For important safety information about the Supplemental Restraint System in a particular vehicle, please see the Owner’s Manual or contact your local Toyota Dealer. (2) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. (3) Do not use the hands-free phone system if it will distract you. A compatible Bluetooth®-enabled phone must first be paired. Phone performance depends upon software, coverage and carrier. (4) Driving while distracted can result in loss of vehicle control. Always drive safely, obey traffic laws and focus on the road and traffic conditions while driving. (5) Availability and accuracy of the information provided by the navigation system is dependent upon many factors. Use common sense when relying on information provided. Services and programming subject to change. Services not available in every city or roadway; updates may be available at an additional cost from your Dealer. (6) Siri Eyes Free is a trademark of Apple Inc., registered in the US and other countries. (7) Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect VSC system effectiveness. (8) Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. (9) Smart Stop Technology operates only in the event of certain simultaneous brake and gas pedal applications. When engaged, the system will reduce engine power to help the brakes bring the vehicle to a stop. Factors including speed, road conditions, and driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving and does not guarantee instant stopping. (10) Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended. (11) The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian Detection system is designed to detect a pedestrian ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians, driver input and weather, light and road conditions. (12) The TSS Pre-Collision System is designed to help avoid or reduce the crash speed and damage in certain frontal collisions only. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, driver input and road conditions. (13) Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions and provide visual and audible alerts and slight steering force when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (14) Lane Departure Alert is designed to read lane markers under certain conditions and provide visual and audible alerts when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (15) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (16) Automatic High Beam system operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off. (17) Based on IHS Automotive: Polk Canadian vehicles in operation and new registrations MY 1996-2015 as of June 30, 2015. (18) ®Aeroplan and the Aeroplan logo are registered trademarks of Aimia Canada Inc.

Details on the above features can be found in the Owner’s Manual or contact your local Toyota Dealer.
