

2018 TUNDRA

TOYOTA

FULLY LOADED, LOADED FULLY

UNCOMPROMISING ENGINEERING.

At Toyota, we think getting a truck should mean getting it all. We don't think that the capacity to get the work done should come at the expense of the space you need to raise a family. We know that an aggressive and commanding exterior doesn't have to be sacrificed for a premium and sophisticated interior. And we're certain that cutting-edge technology doesn't have to take a back seat to practical affordability. Enter the new 2018 Toyota Tundra, a half-ton of meticulously engineered heavy metal that proves a full-size pickup truck can have it all.

LUXURY ON A LARGE SCALE

SELECT FEATURES

- Available Display Audio⁴ w/Navigation⁵
- Multi-Information Display
- Backup Camera
- Available Leather Seat Surfaces
- Available Heated & Ventilated Driver & Front Passenger Seats
- Available Dual Zone Climate Control
- Available Power Tilt/Slide Moonroof

DESIGNED BEAUTIFULLY, BUILT RUGGEDLY.

Bold can be beautiful. The new 2018 Toyota Tundra is proof of that. Built to be tough on terrain, the chiselled masculine exterior was designed to get the job done, and look good doing it. And our engineers didn't stop there. The craftsmanship and design of the Tundra flows seamlessly from the outside in. Once inside, you'll notice that competency wasn't overlooked in the quest for comfort. After a long day on the job site, you need a full-size truck with intuitive technology and a spacious, premium interior that can get you to your destination reliably and comfortably, and that's what Tundra delivers.

CABIN TO BED CONVENIENCE

LEAVE NO BOULDER UNTURNED

4x4 Double Cab SR5 Plus Long Bed shown in Alpine White.

Split Fold-Up Rear Seat

Available Tie-Down Cleats

Available Deck Rail System

Large Glove Box

Deep Armrest Storage

GETS MORE THAN HEARTS RACING

INTRODUCING THE ALL-NEW TRD SPORT PACKAGE

Toyota Racing Development (TRD) is one of the most revered names in performance. That's why the team at our exclusive in-house TRD facilities in North Carolina work tirelessly to ensure that every vehicle that carries the TRD badge is worthy of the name. Our latest creation, the all-new TRD Sport Package, brings the attitude with exclusive exterior features like a powerful hood scoop, bedside decal, and 20-in. alloy wheels with a black-accented finish. It's one bold ride built to get your motor running.

LED HEADLIGHTS More light. More efficiency. And a whole lot more attitude. In addition to the available LED fog lights, Tundra's LED headlights incorporate a head-turning Daytime Running Light (DRL) treatment, giving this truck an aggressive look that won't be ignored.

TRD SPORT BILSTEIN® SHOCKS AND SWAY BARS The TRD Sport Package gets a unique suspension that includes upgraded sway bars and Bilstein® dampers. Tuned by the engineers at Toyota Racing Development, these components work to give this truck flatter cornering and a smooth ride.

TRD SPORT SHIFTER Keep a firm grip on things. The leather-wrapped shift knob features silver-accented trim and is embroidered with the TRD logo.

4x4 CrewMax TRD Sport Package shown in Barcelona Red Metallic.

INTEGRATED HITCH RECEIVER Tundra is available with a towing hitch receiver, which is integrated into the frame. The 4 and 7 pin trailer connections have been repositioned to allow for greater accessibility and convenience.

INTEGRATED TRAILER BRAKE CONTROLLER Tundras equipped with the i-FORCE 5.7L V8 come standard with an Integrated Trailer Brake Controller. When connected to a compatible trailer, this system will help your trailer apply its brakes when you apply the brakes in your Tundra. You can also easily monitor system controls while driving via the Multi-Information Display.

TOW/HAUL MODE The available TOW/HAUL mode expands the use of lower gear ranges, helping prevent the transmission from awkwardly shifting or “hunting” for the right gear. Particularly useful while towing or hauling a heavy load, the system enhances acceleration, downhill engine braking, pulling power, and cruising comfort.

TRAILER-SWAY CONTROL When a vehicle is towing a trailer, various weather, road, and steering conditions can result in dangerous trailer sway. Tundra’s available TSC is a system that detects trailer sway and applies brake pressure to individual wheels and controls engine torque to help stabilize the trailer. The system also illuminates the stop lamps to alert drivers to the fact that the vehicle is decelerating.

HEAVY DUTY

TO GET YOU THROUGH THE LONG HAUL

OVER 80 YEARS OF INNOVATION.

You can learn a lot in 80 years. Enough to master any subject. In our case, that subject is impactful full-sized pickup trucks. Eighty years gave us the knowledge to design a truck that tows with unquestionable reliability. The wisdom to build a truck that can effortlessly deliver impressive payloads. The insight to create a truck that can help detect and stabilize trailer sway, even when towing up to 10,000 lb. And it gave us the expertise to create the 2018 Tundra, 80 years of innovation rolled into one impressive truck. It's that kind of durability and reliability you can count on for years to come with the fact that over 90% of Toyota Pickups sold in Canada in the last 20 years are still on the road today.¹⁶

THE PROOF IS IN THE POWER

There's something very liberating about a fork in the road. The opportunity to create your own adventure and to rewrite your own destiny. The freedom to choose was not lost on us when we created the 2018 Toyota Tundra. With two torque-heavy, fuel conscious engines, you have more than enough power to overcome any obstacle that stands in your way. And with great power comes the need for even greater control. That's why we equipped Tundra with a 6-speed automatic transmission and an available two-piece driveshaft and massive 10.5-in. ring gear. So go ahead, throw any passion project at the Tundra. It can handle it.

i-FORCE 4.6-LITRE V8 The efficient 4.6 L i-FORCE V8 may be compact, but Tundra's 4.6 L V8 utilizes Dual Independent Variable Valve Timing with intelligence and an Acoustic Control Induction System technology to produce an impressive 310 hp and 327 lb.ft. of torque.

i-FORCE 5.7-LITRE V8 Tundra's available i-FORCE 5.7 L V8 has the muscle to cut big jobs down to size, delivering 381 hp and 401 lb.ft. of torque thanks to dual overhead cams, 32 valves and Dual Independent Variable Valve Timing with intelligence.

4x4 CrewMax 1794 Edition-shown in Smoked Mesquite.

THE RIGHT FRAME THE RIGHT FRAME OF MIND

MASSIVE RING GEAR Massive torque loads need a massive ring gear to manage the stress of repeated heavy payloads and towing. That's why the 5.7-Litre engine is equipped with a 266 mm (10.5 in.) ring gear, and the 4.6-Litre engine is matched to a 241 mm (9.5 in.) ring gear.

TRAPEZOIDAL FRAME SECTION When you think of suspension, you probably think about up-and-down movement. But our engineers also thought about lateral stability. The trapezoidal rear section of Tundra's TripleTech™ frame allows the rear leaf springs to be positioned toe-out, where the front is mounted farther out than the rear. The result: The trapezoidal rear frame section and the toe-out rear leaf springs combined deliver superior lateral stability when cornering and especially while towing heavy loads.

POWERFUL BIG BRAKES With big power comes big responsibility. That's why Tundra is equipped with enormous 13.9-in. front Brake Rotors and 4-piston calipers. Particularly when you're towing, Tundra's big rotors can help to provide the confidence that when you apply the brakes, the Tundra – and your trailer – will come safely to a stop.

AUTOMATIC LIMITED-SLIP DIFFERENTIAL Auto LSD uses the rear brakes to simulate the action of a mechanical limited-slip differential and is much easier to maintain. With Auto LSD, Tundra automatically applies brake pressure to the powered wheel with limited-to-no traction without restricting engine power. This helps increase resistance at the slipping wheel, which in turn helps feed power to the wheel with grip.

4WD ACTIVE TRACTION CONTROL Tundra models equipped with 4WD include an A-TRAC system that optimizes traction across the front and rear axles simultaneously, helping improve grip on low-traction surfaces. This A-TRAC system also allows full use of the 2-speed transfer case, so you always have on-demand access to Tundra's incredible torque.

DOUBLE CAB Available with Standard or Long Beds.

Available as a 4x2 or 4x4, Tundra Double Cab boasts a spacious cabin with seating for five or six and tons of interior storage. Equipped with your choice of a 4.6 L or 5.7 L i-FORCE V8 and two bed lengths: a 6.5-foot Standard Bed or 8.1-foot Long Bed.

DOUBLE CAB OR CREWMAX

CREWMAX Available with Short Bed.

CrewMax 4x4 is propelled by Toyota's 5.7 L i-FORCE V8 mated to a 6-speed Automatic Transmission. The cavernous cabin is loaded with innovative technologies, tons of storage, and ample seating for five crew members.

4x4 Double Cab SR5 TRD Off-Road Package shown in Inferno.

READY FOR ANYTHING

PEACE OF MIND INSIDE AND OUT

STANDARD TOYOTA SAFETY SENSE™ (TSS-P)¹⁰

PRE-COLLISION SYSTEM WITH PEDESTRIAN DETECTION¹¹ Provides collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur. In certain conditions, the Pre-Collision System with Pedestrian Detection (PCS w/PD) may also help to detect pedestrians and help prevent or mitigate a collision.

AUTOMATIC HIGH BEAMS¹⁴ Designed to detect oncoming and preceding vehicles' lights and depending upon the circumstances, Automatic High Beams (AHB) can switch between high and low beams for you.

LANE DEPARTURE ALERT¹² Alerts you if you start to drift out of your lane when visible lane markings are detected.

DYNAMIC RADAR CRUISE CONTROL¹³ Using forward sensing radar technology, the system can automatically adjust vehicle speed to help maintain a preset following distance between you and the vehicle directly in front of you.

Toyota
Safety
Sense

WE ALL DESERVE TO ARRIVE SAFE

At Toyota, we believe that no matter what the destination, everyone deserves to arrive safely. That's why we created Toyota Safety Sense™ (TSS)¹⁰ – an advanced suite of innovative safety features designed to help protect drivers, passengers, pedestrians (TSS-P only) and people in other vehicles from harm. TSS is comprised of active features such as Pre-Collision System (PCS),¹¹ Lane Departure Alert (LDA)¹² and Automatic High Beams (AHB)¹⁴ and are standard on virtually all models. TSS represents the latest milestone in our long history of creating advancements and innovations in safety that have helped prevent crashes and protect people.

NEW VEHICLE WARRANTY SUMMARY – No deductibles – no transfer fees

COMPREHENSIVE COVERAGE 3 YEARS OR 60,000 KM.

This warranty includes 24 hour Roadside Assistance and other benefits, as well as coverage of repairs on any part of the vehicle that is defective in material or workmanship under normal use and maintenance. Different warranties apply to original tires.

POWERTRAIN COMPONENTS 5 YEARS OR 100,000 KM.

This warranty covers repairs to powertrain components that are defective in material or workmanship under normal use and maintenance.

MAJOR EMISSION CONTROL COMPONENTS 8 YEARS OR 130,000 KM.

This warranty covers repairs to specified major emission components that are defective in material or workmanship under normal use and maintenance.

CORROSION PERFORATION 5 YEARS/UNLIMITED DISTANCE.

This warranty covers any sheet metal found, under normal use, to have developed a perforation from corrosion due to defects in material or workmanship.

TEST DRIVE AND EARN AEROPLAN® MILES TODAY

You can earn Aeroplan®¹⁸ Miles when you purchase, test drive, or service your vehicle at a Toyota Dealership.

Speak to your Dealer for full details.

GENUINE ACCESSORIES

Toyota's Genuine Accessories are custom designed and built to fit your specific Toyota vehicle and are backed by a Toyota Warranty. For a complete list of vehicle-specific accessories, visit accessories.toyota.ca or your local Dealer.

DISCLAIMERS

(1) All Toyota vehicles shown in this brochure have Supplemental Restraint Systems (SRS). For important safety information about the Supplemental Restraint System in a particular vehicle, please see the Owner's Manual or contact your local Toyota Dealer. (2) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. (3) Do not use the hands-free phone system if it will distract you. A compatible Bluetooth®-enabled phone must first be paired. Phone performance depends upon software, coverage and carrier. (4) Driving while distracted can result in loss of vehicle control. Always drive safely, obey traffic laws and focus on the road and traffic conditions while driving. (5) Availability and accuracy of the information provided by the navigation system is dependent upon many factors. Use common sense when relying on information provided. Services and programming subject to change. Services not available in every city or roadway; updates may be available at an additional cost from your Dealer. (6) Vehicle Stability Control (VSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions and driver steering input can all affect VSC system effectiveness. (7) Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. (8) Smart Stop Technology operates only in the event of certain simultaneous brake and gas pedal applications. When engaged, the system will reduce engine power to help the brakes bring the vehicle to a stop. Factors including speed, road conditions, and driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving and does not guarantee instant stopping. (9) Do not rely exclusively on the Blind Spot Monitor System and Rear Cross-Traffic Alert System. They are not collision-avoidance systems or substitutes for safe and attentive driving. (10) Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended. (11) The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian Detection system is designed to detect a pedestrian ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians, driver input and weather, light and road conditions. (12) Lane Departure Alert is designed to read lane markers under certain conditions and provide visual and audible alerts when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (13) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (14) Automatic High Beam system operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off. (15) Payload = Passengers, Equipment, Luggage and Cargo. (16) Based on IHS Automotive Canadian Vehicles in Operation and New Registrations MY 1997-2016 as of June 30, 2016. Actual longevity of any vehicle will vary based upon operating conditions. (17) HomeLink is a registered trademark of Johnson Controls. (18) ®Aeroplan and the Aeroplan logo are registered trademarks of Aimia Canada Inc.

Details on the above features can be found in the Owner's Manual or contact your local Toyota Dealer.

Toyota Canada Inc. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of printing. In some cases, certain changes in production capacity, standard equipment, options or product delays may occur which would not be reflected in this brochure. Toyota Canada Inc. reserves the right to make these changes without notice or obligation. The Toyota website toyota.ca – or your Toyota Dealer is your best source for up-to-date information.
